

Assignment-5

(Node Server: Dominos needs your help!)

(Download the zip file and complete the template code)

Dominos has hired you for a backend role in their software team. They want you to start with creating the server. You are then asked to serve 2 endpoints: /welcome and /contact.

Details are mentioned in the acceptance criteria below **Acceptance Criteria:**

- Create a Node Server that listens to PORT 8081.
- Handle the following endpoints:
 1. /welcome - Should serve content of type text/plain - Returned status should be 200 - Response should be Welcome to Dominos!
 2. /contact - Should serve content of type application/json - Returned status should be 200 - Response should be

```
{  
  
  phone: '18602100000',  
  
  email: 'guestcaredominos@jublfood.com'  
}
```

3. Any other routes besides the ones mentioned above should send status 404
